

Your World Paradigm

Imagine four blindfolded men all touching the same elephant trying to work out using touch alone what it is in front of them.

The one holding the tail might think he is holding a rope, the one with the tusk might think he has a spear, the one with the leg a tree and the one with the ear a sail.

It's only when they shift paradigms by removing the blindfold they can really understand what is truly in front of them.

Most of us walk through our entire lives like this.

What we're going to do over the course of this module is shift your paradigm, change how you see the world, remove your blindfold so you can see the whole elephant!

The first thing you have to realise is wherever you are in life right now, whatever your situation you have custom built this exact situation. So if your unhappy with a certain aspect of your life, maybe you're over weight, don't have as much money as you'd like, spend too much time working...what ever it is...you have designed it that way.

Most probably you did not do this consciously, but it was you never the less. Over the course of this module we're going to look at the unseen forces at work which have led you to this situation and how by becoming aware of and harnessing those forces you can consciously design your life in a new way.

But first I really need to hammer this home, where ever you are in life, what ever inspired you to take this course, what ever it is you're not happy with in life...

It's not a result of your lack of skills, it's not your past, the government, your parents, your race, your education, it's not the school you went to or the car you drive,

IT'S YOU.

You are exactly where you have designed your life to be.

Even more concerning...

You can NEVER be the success you want to be.

You can NEVER achieve the goals you've set yourself signing up to this course...

It's self evident. If you were capable of it you would have already achieved it...and you wouldn't be paying me money to take this course.

"So hang on a minute Sam," I hear you cry, "what's the bloody point then?"

If you're not the person capable of achieving the success you want, you have only one choice...

To *BECOME* the person who can achieve the kind of success you want.

You need to grow.

You need to change your paradigm...you need to see the whole elephant.

Is this possible?

ABSOLUTELY.

Is this possible in the next few weeks.

ABSOLUTELY.

Buckle up Dorothy, Kansas is about to go bye, bye...
